

Finiture

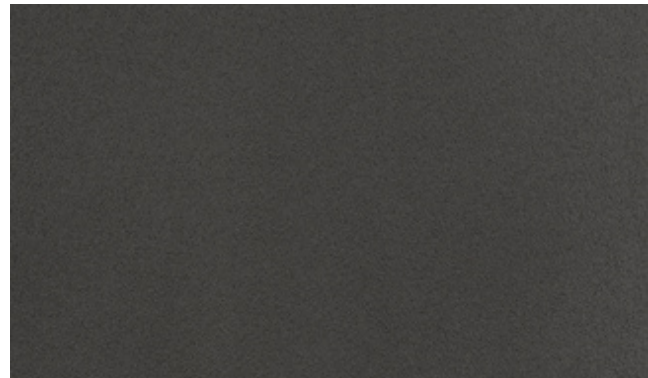

Finiture

Finiture che esaltano l'architettura contemporanea, con una palette che permette al serramento di dialogare armoniosamente con l'interior design, ma in grado anche di distaccarsene creando giochi di colori e luci che non hanno paura di lasciare il segno.

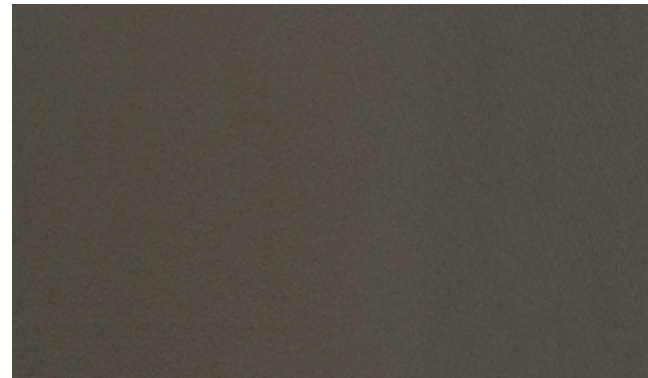

Alluminio

Finishes that enhance contemporary architecture, with a palette that allows the window to dialogue harmoniously with the interior design, but also able to detach itself by creating plays of color and light that are not afraid to leave their mark.
